It offered a refreshing perspective for teachers, inspiring us to bring these values and methods into our classrooms.

SCIENCE MODELS ACTIVITY

Here's exploring the fascinating world of internal organs of humans, by creating models that help us understand their structure and function. By building models, we gain a deeper understanding of how different organs work together to keep our bodies functioning properly. Let's delve into the activity where our 3rd and 4th graders show their creativity, have fun, and learn about the amazing internal organs that keep our bodies alive and functioning!

ENVIRONMENT DAY

World Environment Day Celebration

On June 5th, 2025, our students marked Environment Day with meaningful activities, including sapling planting, an informative assembly on the theme "Beat Plastic Pollution", and poster-making to raise awareness. Their efforts reflect a strong commitment to protecting our planet. Let's continue to grow green and act responsibly for a better tomorrow! 🌱🌍

NATIONAL READING DAY

June 19th, 2025 is celebrated as National Reading day every year, in honour of P.N. Panicker, considered the "Father of the Library Movement in India," and his contributions to promoting literacy. At The Oxford Senior Secondary School, our students creatively formed the shape of an open book and a person reading, symbolising the joy of reading and the power of books to promote the habit of reading which helps the children to enlighten their world with knowledge, curiosity and shape their future.

Yoga unites us with nature and within, blending poses, breath, and meditation for holistic well-being. Let’s carry this spirit every day—celebrating Yoga’s gift of balance, health, and inner peace.
